Read the following passage about a trending topic related to the text and decide whether each statement is True (T) or False (F).

> 📌 **拓展话题：AI音乐生成 vs 人类DJ**

> In 2024, AI music generators like Suno and Udio can create full songs in seconds. Some DJs worry AI will replace them, while others use AI as a tool to enhance their performances. Robbie Wilde, a deaf DJ, uses software that turns music into visual colors on a screen — a form of technology helping him overcome his disability. Similarly, AI tools can help disabled musicians create music they cannot play physically. The question is: will AI replace human creativity, or will it become a new instrument for artists to explore?

1. AI music generators like Suno and Udio can create songs in minutes.
   ( ) T ( ) F

2. Robbie Wilde refuses to use any technology in his DJ performances.

> In 2023, a 82-year-old woman named Ma Aiyun went viral on Chinese social media after receiving her bachelors degree from a university in Anhui. She had spent four years attending classes alongside students young enough to be her grandchildren. Her story echoes that of Gac Filipaj, the Columbia University janitor who earned his degree after 19 years of cleaning floors. Both stories prove that it is never too late to pursue education. In China, the government has been promoting lifelong learning, with universities offering special programs for elderly students.

> In 2023, Chinas Experimental Advanced Superconducting Tokamak (EAST), known as the artificial sun, set a new world record by maintaining a plasma temperature of 120 million degrees Celsius for 403 seconds. This breakthrough in nuclear fusion technology could provide clean energy for the future. Yu Min, the father of Chinas hydrogen bomb, laid the foundation for this research. While nuclear fission (used in current power plants) splits atoms, nuclear fusion combines them — the same process that powers the sun. Fusion produces more energy with less radioactive waste.

Part VI 热门拓展（每题1分，共5分）

Read the following passage about a trending topic related to the text and decide whether each statement is True (T) or False (F).

> 📌 **拓展话题：中国核聚变 — 人造太阳**

> In 2023, Chinas Experimental Advanced Superconducting Tokamak (EAST), known as the artificial sun, set a new world record by maintaining a plasma temperature of 120 million degrees Celsius for 403 seconds. This breakthrough in nuclear fusion technology could provide clean energy for the future. Yu Min, the father of Chinas hydrogen bomb, laid the foundation for this research. While nuclear fission (used in current power plants) splits atoms, nuclear fusion combines them — the same process that powers the sun. Fusion produces more energy with less radioactive waste.

1. EAST is also known as the artificial sun.

Read the following passage about a trending topic related to the text and decide whether each statement is True (T) or False (F).

> 📌 **拓展话题：大学新生独立报到 — 清华大学新规**

> In 2023, Tsinghua University made headlines by requiring all freshmen to check in alone — no parents allowed in the dormitory area. The policy aims to foster independence from day one. Similarly, Zhejiang University offers a Go It Alone challenge, rewarding students who arrive without parental help. These initiatives respond to a growing concern: many Chinese freshmen have never done laundry, cooked a meal, or handled registration paperwork independently. The policy echoes the US trend described in the text, where colleges now ban parents from taking charge at the registrars office.

> In 2024, a survey by China Youth Daily found that 68% of college freshmen video-call their parents daily during the first semester. Video calling apps like WeChat have become the lifeline between empty-nest parents and their college-age children. This contrasts sharply with the parents described in the text, who drove away in silence after dropping their youngest child. Psychologists suggest that while video calls help, over-dependence on daily contact can hinder students independence. The healthy balance is 2-3 calls per week, allowing students to build their own social circles.

1. There was nothing heartening in the news: _____ Iran's nuclear intentions and what should be done about them to a new report suggesting the Gulf oil spill is not breaking down as rapidly as once thought.
2. I know every generation _____, but there is a magnitude and deadliness to today's problems that troubles me.
3. That was certainly true _____ me off at college 40 years ago this week.
4. It's hard to imagine what the world will _____ years from now.
5. Will humankind be thriving, getting by, _____ or the spread of disease or climate change or extremism?

Part IV 英译汉（每题5分，共15分）

将下列课文原句翻译成中文。

1. "Imagination is more important than knowledge," Einstein wrote, "for knowledge is limited to all we now know and understand, while imagination embraces the entire world." Hold that thought and consider it alongside these words, also written by Einstein: "The value of a man should be seen in what he gives and not in what he is able to receive."

2. Book learning and lab time are, of course, highly important, but Einstein and I believe they are most helpful when they are accompanied by a sharp sense of inquiry, a good world-view, and a genuine commitment to community and helping others.

3. There was nothing heartening in the news: from the debate over Iran's nuclear intentions and what should be done about them to a new report suggesting the Gulf oil spill is not breaking down as rapidly as once thought.

Part V 阅读理解（每题1分，共5分）

Read the following passage and decide whether each statement is True (T) or False (F).

> On the way home, I glanced over the newspapers. There was nothing heartening in the news: from the debate over Iran's nuclear intentions and what should be done about them to a new report suggesting the Gulf oil spill is not breaking down as rapidly as once thought. And that's just the front page above the fold. I know every generation faces its own challenges, but there is a magnitude and deadliness to today's problems that troubles me. Of course, the world has always had its urgent challenges. That was certainly true when my parents dropped me off at college 40 years ago this week. It's har

Part VI 热门拓展（每题1分，共5分）

Read the following passage about a trending topic related to the text and decide whether each statement is True (T) or False (F).

> 📌 **拓展话题：空巢父母 — 视频通话缓解思念**

> In 2024, a survey by China Youth Daily found that 68% of college freshmen video-call their parents daily during the first semester. Video calling apps like WeChat have become the lifeline between empty-nest parents and their college-age children. This contrasts sharply with the parents described in the text, who drove away in silence after dropping their youngest child. Psychologists suggest that while video calls help, over-dependence on daily contact can hinder students independence. The healthy balance is 2-3 calls per week, allowing students to build their own social circles.

1. 68% of college freshmen video-call their parents daily in the first semester.

( ) T ( ) F

2. WeChat is the most popular video calling app in China.

( ) T ( ) F

3. Psychologists recommend daily video calls for all students.

> 📌 **拓展话题：乡村振兴 — 直播带货改变山村**

> In 2024, livestream commerce (直播带货) has transformed rural China. Farmers in remote villages sell local products through Douyin and Taobao Live, earning incomes that rival city jobs. Mao Xianglin, the village secretary who carved a road through mountains, represents the spirit of rural revitalization. Today, villages like his use e-commerce platforms to sell agricultural products nationwide. The government reports that over 8 million people have been lifted out of poverty through rural e-commerce. Livestreaming has become the new road out of poverty, replacing the physical roads that earlier generations carved by hand.

The Beijing-Zhangjiakou line that Zhan Tianyou built in 1909 has been transformed into a high-speed route serving the 2022 Winter Olympics. Zhan, the Father of Chinas Railroad, could never have imagined that his 200-km line would evolve into a 45,000-km network connecting every major city. Chinas CR400AF trains, known as Fuxing, run at 350 km/h, faster than Japans Shinkansen. The system now extends to Southeast Asia through the China-Laos Railway, exporting Chinese rail technology worldwide.

Read the following passage about a trending topic related to the text and decide whether each statement is True (T) or False (F).

> 📌 **拓展话题：南非零日 — 全球水资源危机**

> In 2024, Cape Town, South Africa, narrowly avoided Day Zero — the day when the city would run out of tap water. The city of 4 million people had restricted each resident to 50 liters of water per day. This crisis echoes the water conservation lesson in the text, where a 5-year-old girl reminded her father to turn off the tap. Globally, 2 billion people lack access to safe drinking water. Chinas South-to-North Water Diversion Project, transferring 45 billion cubic meters of water annually, is one of the largest engineering projects attempting to address regional water imbalance.

> In 2024, Israel produces 80% of its drinking water through desalination — removing salt from seawater. The Sorek Desalination Plant, one of the worlds largest, processes 624,000 cubic meters of seawater per day. This technology offers hope for water-scarce countries. However, desalination has environmental costs: it consumes large amounts of energy and produces concentrated brine that harms marine life. The global water crisis, described in the text as the No.1 challenge of the 21st century, has pushed nations to explore solutions like desalination, water recycling, and cloud seeding. The UAE has even experimented with cloud seeding to create artificial rain.

Read the following passage about a trending topic related to the text and decide whether each statement is True (T) or False (F).

> 📌 **拓展话题：长江十年禁渔 — 水生态修复**

> In 2021, China launched a 10-year fishing ban on the Yangtze River, the countrys longest waterway. By 2024, water quality in the Yangtze had improved significantly, with rare species like the finless porpoise (江豚) returning. The ban affects 230,000 fishermen who had to find new livelihoods. This effort addresses the water pollution crisis described in the text, where 90% of groundwater was contaminated. The government has also invested in water treatment plants along the Yangtze, spending over 300 billion yuan. The project shows that water quality restoration requires both policy action and long-term commitment.

> In 2024, digital detox camps (数字排毒营) have become popular in China and the US. These camps charge $500-1000 for a weekend without phones, WiFi, or screens. Participants do outdoor activities, read books, and talk face-to-face. This trend echoes Paul Millers experiment described in the text — going offline for a year. Studies show that 73% of Gen Z feel anxious when separated from their phones, a condition called nomophobia (no-mobile-phone phobia). However, after just 3 days without screens, participants report better sleep, improved focus, and deeper conversations. The camps prove that digital detox is not about rejecting technology, but about regaining control.

Part VI 热门拓展（每题1分，共5分）

Read the following passage about a trending topic related to the text and decide whether each statement is True (T) or False (F).

> 📌 **拓展话题：数字排毒营 — 没有手机的夏令营**

> In 2024, digital detox camps (数字排毒营) have become popular in China and the US. These camps charge $500-1000 for a weekend without phones, WiFi, or screens. Participants do outdoor activities, read books, and talk face-to-face. This trend echoes Paul Millers experiment described in the text — going offline for a year. Studies show that 73% of Gen Z feel anxious when separated from their phones, a condition called nomophobia (no-mobile-phone phobia). However, after just 3 days without screens, participants report better sleep, improved focus, and deeper conversations. The camps prove that digital detox is not about rejecting technology, but about regaining control.

Part VI 热门拓展（每题1分，共5分）

Read the following passage about a trending topic related to the text and decide whether each statement is True (T) or False (F).

📌 拓展话题：手机隔离箱 — 中国高校的新趋势

> In 2024, Chinese universities including Tsinghua and Zhejiang University installed phone isolation boxes (手机隔离箱) in classrooms. Students voluntarily place their phones in locked pouches during class, retrieving them afterward. The isolation box described in the text — a physical box that locks your phone away — has become a real product sold on Taobao for 30-50 yuan. A survey showed that 89% of students using these boxes reported improved focus during lectures. However, critics argue that self-discipline, not external tools, is the real solution. The debate continues as smartphone addiction affects an estimated 27% of Chinese college students.
